

## Lenovo Storage S2200 Product Guide (withdrawn product)

The Lenovo Storage S2200 (shown in the following figure) provides simplicity, speed, scalability, security, and high availability for small to large businesses. The S2200 SAN array delivers enterprise-class storage management technology in an affordable solution with a wide choice of host connectivity options, flexible drive configurations, and enhanced data management features.

The S2200 is a perfect fit for small offices and remote and branch offices of large enterprises that need a primary storage solution that supports general purpose workloads, such as file and print serving, web serving, email and collaboration, and small databases. The S2200 is also well-suited for secure archive storage or a low-cost backup solution.

Figure 1. Lenovo Storage S2200

The S2200 offers the flexible choice of 6/12 Gb SAS, 1/10 Gb iSCSI, and 4/8 Gb Fibre Channel (FC) host connectivity protocols. The Converged Network Controller (CNC) design of the S2200 makes the selection of iSCSI or FC host connectivity as simple as attaching corresponding transceivers or Direct-Attach Copper (DAC) cables to the SFP/SFP+ ports on the RAID controller.

The S2200 supports up to 96 drives with up to three external expansion enclosures. It also offers flexible drive configurations with the choice of 2.5-inch and 3.5-inch drive form factors, 10 K or 15 K rpm SAS and 7.2 K rpm NL SAS hard disk drives (HDDs) and self-encrypting drives (SEDs), and SAS solid-state drives (SSDs). The S2200 can be scaled up to 480 TB of raw storage capacity.

### Did you know?

The S2200 supports Intelligent Real-time Tiering capabilities that help optimize system performance, reduce costs, and simplify management. The base software includes the ability to move data dynamically between SAS HDDs that are optimized for cost per IOPS and NL SAS HDDs that are optimized for cost per GB. With the optional software license, the S2200 supports hybrid tiering across HDDs and SSDs.

The S2200 can be upgraded to the Lenovo Storage S3200 by replacing the RAID controllers in the controller enclosure during a planned offline maintenance window without the need to migrate or move data and re-configure the attached hosts. The new S3200 RAID controller recognizes the array configuration and preserves the controller's host port parameters (for example, FC WWN).

The S2200 supports battery-free cache protection, which reduces maintenance costs and provides permanent backup of unwritten cache data if there is a power failure.

## Key features

The S2200 storage system includes the following key features and benefits:

- Low-cost, entry-level storage with a single controller or dual active/active controller configurations for high availability and performance.
- Flexible host connectivity to match diverse client needs with support for 6/12 Gb SAS (SAS controller) or 1/10 Gb iSCSI or 4/8 Gb FC connectivity (FC and iSCSI controller).
- Support for 6 Gb SAS drive-side connectivity with support for 12x 3.5-inch large form factor (LFF) or 24x 2.5-inch small form factor (SFF) drives in the controller enclosure; scalable up to 48 LFF drives per system with the attachment of Lenovo Storage E1012 expansion enclosure (12x LFF drives each) or up to 96 SFF drives per system with the attachment of Lenovo Storage E1024 expansion enclosure (24x SFF drives each) to satisfy growing needs for storage capacity and performance.
- Flexibility in storing data on high-performance SAS SSDs, performance-optimized enterprise SAS HDDs, or capacity-optimized enterprise NL SAS HDDs; mixing and matching drive types and form factors within a single system to perfectly meet performance and capacity requirements for various workloads.
- Support for SEDs to allow clients to secure their sensitive data and to comply with various security regulations, when required.
- Rich set of standard functions available at no extra cost, including virtualized storage pools, snapshots, thin provisioning, rapid rebuild, real-time HDD tiering, and SSD read cache.
- Optional licensed functions, including higher number of snapshots for more scalability, real-time SSD tiering for boosting IOPS performance, and asynchronous replication for 24x7 data protection and disaster recovery.
- In-chassis upgrade to the S3200 storage system without the need to migrate data or to re-configure attached hosts.
- Intuitive, web-based GUI for easy system set up and management.
- Designed to comply with NEBS and MIL-STD requirements.
- Designed for 99.999% availability.

The S2200 supports the complete range of data storage requirements, from highly used applications to high-capacity, low usage applications.

The following 3.5-inch drives are supported:

- High-performance solid-state drives (10 drive writes per day [DWD]): 400 GB
- Performance-optimized, enterprise class disk drives: 600 GB and 900 GB 10 K rpm
- High-capacity, archival-class nearline disk drives: 2 TB, 4 TB, 6 TB, 8 TB, and 10 TB 7.2 K rpm

The following 2.5-inch drives are supported:

- High performance solid-state drives (3 DWD and 10 DWD): 400 GB, 800 GB, and 1.6 TB
- High performance self-encrypting solid-state drives (10 DWD): 400 GB and 800 GB
- Capacity-optimized solid-state drives (1 DWD): 3.84 TB
- Performance-optimized, enterprise class disk drives:
  - 300 GB and 600 GB 15 K rpm
  - 600 GB, 900 GB, 1.2 TB, and 1.8 TB 10 K rpm
- High-capacity, archival-class nearline disk drives: 1 TB and 2 TB 7.2 K rpm

Other drives and expansion units are designed to be dynamically added with virtually no downtime, which helps to quickly and seamlessly respond to ever-growing capacity demands.

The S2200 storage system offers high levels of system and data availability with the following technologies:

- Dual-active RAID controllers with low latency cache mirroring
- Dual-port drives (HDDs and SSDs) with automatic drive failure detection and rapid RAID rebuild with global hot spares
- Redundant hardware, including host ports, controller modules, and power supplies and fans
- Hot-swappable and customer replaceable components, including controllers, power supplies with fans, and drives
- Automated path failover support for the data path between the host and the drives with multipathing software
- Non-disruptive controller firmware upgrades for dual controller configurations with multipathing

The following functions are included with every S2200:

- **Intelligent Real-time Tiering for HDDs:** Storage tiering helps optimize storage use with intelligent data placement to improve system performance, reduce costs, and simplify management. S2200 automatically and dynamically moves frequently accessed data to higher performing HDDs in the system without manually creating and managing storage tier policies.
- **RAID levels 1, 5, 6, and 10:** Provide the flexibility to choose the level of data protection that is required.
- **Virtualized storage pools:** Enables rapid, flexible storage provisioning and simple configuration changes. Stored data is distributed across all drive groups in the pool (wide striping), which helps improve performance, lower latency, and achieve higher volume capacities. When a new drive group is added to the pool, the system performs automatic rebalancing to use all drives in the pool for better performance.
- **Thin provisioning:** Optimizes efficiency by allocating drive storage space in a flexible manner among multiple applications that is based on the minimum required space by each application at any specific time. With thin provisioning, applications use only the space they are actually using and not the total space that was allocated to them, which allows clients to purchase storage they need today and add storage as application requirements grow.
- **SSD Read Cache:** An extension of the controller's cache to improve performance of read-centric workloads.
- **Rapid RAID Rebuild:** Helps significantly decrease the time to recover lost data by rebuilding only the stripe where the corruption occurred, not the empty space or other stripes.
- **Snapshots:** Enables creation of copies of data for backup, parallel processing, testing, and development, and have the copies available almost immediately. Base software supports up to 64 snapshot targets per system.

The S2200 storage capabilities can be expanded with optional licensed functions. Each optional S2200 function is licensed on a per-system basis and covers controller enclosure and all attached expansion units.

The following optional licensed functions are available:

- **Intelligent Real-time Tiering for SSDs:** The SSD tiering upgrade option enables the use of SSDs as read and write data storage in the hybrid HDD and SSD storage configurations. Also, this option makes it easy and economical to deploy hybrid storage by dynamically moving frequently accessed data to SSDs in the system, which results in flash drive performance without manually creating and managing storage tier policies.
- **Snapshots upgrade:** The snapshot upgrade options increase the supported number of snapshot targets to 256 or 512 per system.

- **Asynchronous Replication:** The asynchronous replication feature provides storage system-based data replication between two peers by using asynchronous data transfers over IP communication links.

The replication is done at predetermined intervals (Now, 1-hour, 12-hour, 24-hour) and does not require high-bandwidth network connection. For ultimate flexibility, S2200 asynchronous replication interoperates with Lenovo Storage S3200 and ThinkSystem DS Series.

The asynchronous replication option must be acquired (or licensed) for both primary (local) and secondary (remote) systems.

The S2200 supports the following management interfaces:

- Web-based graphical user interface (GUI) via HTTP that requires only a supported browser (Microsoft Internet Explorer, Google Chrome, or Mozilla Firefox); therefore, there is no need for a separate console or plug-in.
- Command line interface (CLI) via Telnet or SSH or through Direct Connect USB.
- HTTP scripting interface with XML encoding.
- SNMP and email notifications.

## Components and connectors

The following figure shows the front of the S2200 SFF chassis and E1024 drive expansion enclosure.

Figure 2. Front view of the S2200 SFF chassis and E1024 drive enclosure

The following figure shows the front of the S2200 LFF chassis and E1012 drive expansion enclosure.

Figure 3. Front view of the S2200 LFF chassis and E1012 drive enclosure

The following figure shows the rear of the S2200 with FC or iSCSI host interfaces with dual RAID controllers. Single RAID controller configurations also are supported.

Figure 4. Rear view of the S2200 with FC or iSCSI host interfaces

The following figure shows the rear of the S2200 with SAS host interfaces with dual RAID controllers. Single RAID controller configurations also are supported.

Figure 5. Rear view of the S2200 with SAS host interfaces

The following figure shows the rear of the E1012 and E1024 drive enclosures with dual I/O expansion modules. Single I/O module configurations also are supported with the single-controller S2200.

Figure 6. Rear view of the E1012 and E1024 drive enclosures

**Note:** The RAID controllers (as shown in Figure 4 and Figure 5) and expansion modules (as shown in Figure 6) include extra service ports with a specialized connector. These ports are reserved for use by a Lenovo service technician.

## System specifications

The following table lists the S2200 storage system specifications.

Table 1. System specifications

Components	Specification
Form factor	S2200 controller enclosure: 2U rack mount E1012 or E1024 drive expansion enclosure: 2U rack mount
RAID controller configuration	Two types of controllers: <ul style="list-style-type: none"> <li>• S2200 SAS controller</li> <li>• S2200 FC and iSCSI controller</li> </ul> Single or dual RAID controller configurations supported. Single controller systems can be upgraded to dual controller non-disruptively. Both controllers in the system must be the same.
RAID levels	RAID 1, 5, 6, and 10
RAID controller cache	6 GB per controller. Battery-free cache protection with flash memory and supercapacitors. Low latency cache mirroring protection for dual controller configurations.
Drive bays	Up to 96 SFF drive bays per system: <ul style="list-style-type: none"> <li>• 24 SFF drive bays in the S2200 controller enclosure</li> <li>• 24 SFF drive bays in the E1024 drive expansion enclosure; up to 3x E1024 enclosures</li> </ul> Up to 48 LFF drive bays per system: <ul style="list-style-type: none"> <li>• 12 LFF drive bays in the S2200 controller enclosure</li> <li>• 12 LFF drive bays in the E1012 drive expansion enclosure; up to 3x E1012 enclosures</li> </ul> Intermix of SFF and LFF enclosures is supported.
Drive technologies	SAS and NL SAS HDDs and SEDs; eMLC SAS SSDs. Intermix of HDDs and SSDs is supported. Intermix of SEDs with HDDs or SSDs is not supported.

Components	Specification
Drive connectivity	<p>Dual-ported 6 Gb SAS drive attachment infrastructure.</p> <p>Controller enclosure with one or two RAID controllers (ports per one controller):</p> <ul style="list-style-type: none"> <li>• 24x 6 Gb SAS internal drive ports (SFF chassis)</li> <li>• 12x 6 Gb SAS internal drive ports (LFF chassis)</li> <li>• 1x 6 Gb SAS x4 (Mini-SAS SFF-8088) expansion port for the attachment of the external drive enclosures</li> </ul> <p>Drive expansion enclosure with one or two expansion modules (ports per one module):</p> <ul style="list-style-type: none"> <li>• 24x 6 Gb SAS internal drive ports (SFF chassis)</li> <li>• 12x 6 Gb SAS internal drive ports (LFF chassis)</li> <li>• 2x 6 Gb SAS x4 (Mini-SAS SFF-8088) expansion ports (IN and OUT) for the daisy chained attachment of the external drive enclosures</li> </ul>
Drives	<p>SFF drives:</p> <ul style="list-style-type: none"> <li>• 400 GB, 800 GB, and 1.6 TB SAS SSDs (3 DWD and 10 DWD)</li> <li>• 400 GB and 800 GB SAS SED SSDs (10 DWD)</li> <li>• 3.84 TB SAS SSDs (1 DWD)</li> <li>• 300 GB and 600 GB 15K rpm SAS HDDs</li> <li>• 600 GB, 900 GB, 1.2 TB, and 1.8 TB 10K rpm SAS HDDs</li> <li>• 1 TB and 2 TB 7.2K rpm NL SAS HDDs</li> </ul> <p>LFF drives:</p> <ul style="list-style-type: none"> <li>• 400 GB SAS SSDs (10 DWD)</li> <li>• 600 GB and 900 GB 10K rpm SAS HDDs</li> <li>• 2 TB, 4 TB, 6 TB, 8 TB, and 10 TB 7.2K rpm NL SAS HDDs</li> </ul>
Storage capacity	Up to 480 TB (48x 10 TB NL SAS HDDs)
Host connectivity	<p>S2200 SAS controller: 2x 6/12 Gb SAS host ports (Mini-SAS HD, SFF-8644)</p> <p>S2200 FC and iSCSI controller: 2x SFP/SFP+ CNC host ports</p> <p>CNC host port options (per RAID controller):</p> <ul style="list-style-type: none"> <li>• 2x 1 Gb iSCSI SFP (1 Gb speed, UTP, RJ-45)</li> <li>• 2x 10 Gb iSCSI SFP+ (1/10 Gb speeds, SW fiber optics, LC)</li> <li>• 2x 8 Gb FC SFP+ (4/8 Gb speeds, SW fiber optics, LC)</li> <li>• 2x 10 Gb iSCSI SFP+ DAC cables</li> </ul>
Host operating systems	Microsoft Windows Server 2012 R2 and 2016; Red Hat Enterprise Linux (RHEL) 6 and 7; SUSE Linux Enterprise Server (SLES) 11 and 12; VMware vSphere 5.5, 6.0, and 6.5.
Standard software features	Intelligent Real-time Tiering for HDDs, Virtualized Storage Pools, Thin Provisioning, SSD Read Cache, Rapid RAID Rebuild, Snapshots (up to 64 targets).
Optional software features	Intelligent Real-time Tiering for SSDs, Snapshots (up to 512 targets), Asynchronous Replication.
Performance	<p>Dual controller configuration:</p> <ul style="list-style-type: none"> <li>• Up to 80,000 random read IOPS (4 KB blocks)</li> <li>• Up to 3.3 GBps sequential read throughput (512 KB blocks)</li> <li>• Up to 2.4 GBps sequential write throughput (512 KB blocks)</li> </ul>

<b>Components</b>	<b>Specification</b>
Configuration maximums	Per system: <ul style="list-style-type: none"> <li>• Maximum number of virtual storage pools: 2 (1 per controller)</li> <li>• Maximum number of logical volumes (total/mapped): 2,048/1,024</li> <li>• Maximum logical volume size: 128 TB</li> <li>• Maximum number of drives in a drive group: 16</li> <li>• Maximum number of drive groups: 32</li> <li>• Maximum global spares: 16</li> <li>• Maximum number of initiators: 8,192 (1,024 per port)</li> <li>• Maximum number of hosts in a host group: 256</li> <li>• Maximum number of host groups: 32</li> <li>• Maximum number of initiators per host: 128</li> <li>• Maximum number of snapshots: 512 (requires an optional license)</li> <li>• Maximum number of replication peers: 1 (requires an optional license)</li> <li>• Maximum number of replication volumes: 32 (requires an optional license)</li> </ul>
Cooling	Redundant cooling with two fans that are built into power supplies.
Power supply	Two redundant hot-swap 595 W AC power supplies.
Hot-swap parts	RAID controllers, expansion modules, optical transceivers, drives, power supplies with fans.
Management interfaces	Web-based GUI; Telnet, SSH, or Direct Connect USB CLI; HTTP scripting with XML encoding; SNMP and email notifications
Security features	Secure Socket Layer (SSL), Secure Shell (SSH), and SEDs
Warranty	Three-year customer-replaceable unit, parts-only limited warranty with 9x5 next business day.
Service and support	Optional warranty service upgrades are available through Lenovo: on-site support, 24x7 coverage, 4-hour response time, 1-year or 2-year warranty extensions, Hard Drive Retention.
Dimensions	<ul style="list-style-type: none"> <li>• LFF chassis: Height: 87 mm (3.4 in), width: 447 mm (17.6 in), depth: 523 mm (20.6 in)</li> <li>• SFF chassis: Height: 89 mm (3.5 in), width: 447 mm (17.6 in), depth: 519 mm (20.5 in)</li> </ul>
Weight	<ul style="list-style-type: none"> <li>• S2200 LFF: Minimum: 17.7 kg (39.0 lb); Maximum: 27.5 kg (60.6 lb)</li> <li>• S2200 SFF: Minimum: 17.8 kg (39.2 lb); Maximum: 24.3 kg (53.6 lb)</li> <li>• E1012: Minimum: 16.8 kg (37.0 lb); Maximum: 26.6 kg (58.6 lb)</li> <li>• E1024: Minimum: 16.9 kg (37.2 lb); Maximum: 23.4 kg (51.6 lb)</li> </ul>

## Controller enclosures

**Product availability:** Relationship and TopSeller models of the Lenovo Storage S2200 are withdrawn and no longer available for ordering. For currently available models of the Lenovo SAN Storage Arrays, refer to:

<http://lenovopress.com/storage/san/lenovo#rt=product-guide>

## RAID controller modules

The S2200 supports single and dual controller configurations. Standard models of the S2200 ship with one or two RAID controller modules (for more information, see Table 2). Single-controller models can be upgraded to dual-controller models non-disruptively.

The following types of RAID controller modules are available:

- S2200 SAS RAID Controllers
- S2200 FC and iSCSI RAID Controllers

S2200 SAS RAID Controllers provide direct SAS attachment for up to two hosts with a supported SAS HBA installed. Each S2200 SAS Controller has two 6/12 Gb SAS ports with Mini-SAS HD (SFF-8644) connectors.

S2200 FC and iSCSI RAID Controllers provide SAN based iSCSI or FC connectivity to the hosts with a supported software initiator or HBA installed. Each S2200 FC and iSCSI Controller has a built-in CNC, which has two SFP/SFP+ ports.

The CNC supports the following storage connectivity protocols, depending on the SFP/SFP+ transceiver installed or DAC cables attached:

- 1 Gb iSCSI with 1 GbE RJ-45 SFP optical modules
- 1/10 Gb iSCSI with 10 GbE SW SFP+ optical modules with LC connectors
- 10 Gb iSCSI with 10 GbE SFP+ DAC cables
- 4/8 Gb Fibre Channel with 8 Gb FC SW SFP+ optical modules with LC connectors

### Notes:

- Both ports on the CNC on the S2200 FC and iSCSI RAID Controller must have the same connectivity type (the same type of SFP/SFP+ modules or DAC cables).
- For dual-controller configurations, both RAID controllers in the system must be of the same type and they must have matching port configurations (that is, the ports on both S2200 RAID controllers must have SFP/SFP+ modules of the same type).

Both SAS controllers and FC and iSCSI controllers have one 6 Gb SAS x4 expansion port (Mini-SAS SFF-8088 connector) for the attachment of the E1012 and E1024 expansion enclosures.

The following table lists ordering information for the RAID controllers and related connectivity options.

Table 4. RAID controllers and connectivity options

Description	Part number	Feature code (MTM 6411-HC1)	Max qty per one S2200
RAID controller modules			
Lenovo Storage S2200 FC and iSCSI Controller	00WC081	AT25	2
Lenovo Storage S2200 SAS Controller	00WC082	AT26	2
FC and iSCSI controller host connectivity options			
Lenovo Storage S2200/S3200 1G RJ45 iSCSI SFP+ Module 1 pack	00WC086	AT2C	4*
Lenovo Storage S2200/S3200 10G SW Optical iSCSI SFP+ Module 1 pack	00WC087	AT2A	4*
Lenovo Storage S2200/S3200 8G Fibre Channel SFP+ Module 1 pack	00WC088	AT28	4*
Cable options for FC and optical iSCSI host connectivity			
Lenovo 1m LC-LC OM3 MMF Cable	00MN502	ASR6	4**
Lenovo 3m LC-LC OM3 MMF Cable	00MN505	ASR7	4**
Lenovo 5m LC-LC OM3 MMF Cable	00MN508	ASR8	4**
Lenovo 10m LC-LC OM3 MMF Cable	00MN511	ASR9	4**
Lenovo 25m LC-LC OM3 MMF Cable	00MN517	ASRB	4**
DAC cable options for 10 Gb iSCSI host connectivity			
Lenovo 1m Passive SFP+ DAC Cable	90Y9427	A1PH	4**
Lenovo 2m Passive SFP+ DAC Cable	00AY765	A51P	4**
Lenovo 3m Passive SFP+ DAC Cable	90Y9430	A1PJ	4**
SAS host connectivity cables - Mini-SAS HD (controller) to Mini-SAS (host)			
1.5m HD-miniSAS to miniSAS SAS Cable	00D5224	A3HX	4**
3m HD-miniSAS to miniSAS SAS Cable	00D5226	A3HY	4**
SAS host connectivity cables - Mini-SAS HD (controller) to Mini-SAS HD (host)			
External MiniSAS HD 8644/MiniSAS HD 8644 1m cable	00WE748	AT1D	4**
External MiniSAS HD 8644/MiniSAS HD 8644 2m cable	00WE749	AT1E	4**
Cable options for 1 Gb iSCSI and Ethernet management ports			
Lenovo Ethernet CAT5E shielded 6m cable	00WE747	AT1G	6***
Spare cables for serial management ports			
Lenovo USB A Male-to-Mini-B 1.5m cable	00WE746	AT1F	1

\* Up to two SFP/SFP+ modules per controller; the modules must be of the same type.

\*\* Up to two cables per controller.

\*\*\* Up to three cables per controller: one cable for 1 GbE management port connection; up to two cables for CNC port connections with 1G RJ45 modules attached.

## System upgrades

The S2200 can be upgraded to Lenovo Storage S3200 functionality by replacing the S2200 controllers with the S3200 controllers during a planned offline maintenance window without the need to migrate or move data and re-configure the attached hosts. The new S3200 controller recognizes the array configuration and preserves the controller's host port parameters, such as FC World Wide Names (WWNs) or iSCSI Qualified Names (IQNs).

For more information about the S3200 storage, including features, capabilities, and ordering information for the S3200 controllers and other S3200 options, see the following Lenovo Storage S3200 Product Guide: <http://lenovopress.com/tips1299>

## Expansion enclosures

The S2200 supports attachment of up to three Lenovo Storage E1012 or E1024 expansion enclosures. Intermix of E1012 and E1024 is supported. The enclosures can be added to the system non-disruptively.

The following table lists the models of the E1012 and E1024 expansion enclosure models.

Table 5. Part numbers for ordering E1012 and E1024 models

Description	Part number
LFF models	
Lenovo Storage E1012 LFF Disk Expansion Single SAS IO Module, Rail Kit, 9x5 NBD	64111B1
Lenovo Storage E1012 LFF Disk Expansion Dual SAS IO Module, Rail Kit, 9x5 NBD	64111B2
SFF models	
Lenovo Storage E1024 SFF Disk Expansion Single SAS IO Module, Rail Kit, 9x5 NBD	64111B3
Lenovo Storage E1024 SFF Disk Expansion Dual SAS IO Module, Rail Kit, 9x5 NBD	64111B4

The part number for the E1012 or E1024 includes the following items:

- One enclosure with two power supplies and fans and with two expansion modules installed
- Two 4. 3m, 1 0A/100 - 250 V, C13 to IEC 320-C14 Rack Power Cables
- Lenovo Storage SAN Rack Mount Kit: Rails 25-inch to 36-inch
- Getting Started Guide
- Warranty Flyer
- Important Notices Flyer
- Documentation Flyer

The E1012 and E1024 support single and dual expansion module configurations. Standard models of the E1012 and E1024 ship with one or two expansion modules (for more information, see Table 5). Single module configurations can be upgraded to dual module configurations non-disruptively. The number of expansion modules in the E1012 or E1024 must match the number of RAID controllers in the S2200.

Each expansion module has two 6 Gb SAS x4 ports (Mini-SAS SFF-8088 connectors) that are labelled IN and OUT. These ports are used for connections to the S2000 and for daisy chaining the E1012 and E1024 enclosures between each other. The expansion port on the S2200 controller is connected to the IN port on the expansion module. The OUT port on the expansion module is connected to the IN port on the expansion module in the adjacent enclosure, and so on.

The expansion connectivity topology for dual controller configurations is shown in the following figure. For single controller configurations, only Controller A path is present.

Figure 7. Expansion connectivity topology

The following table lists the ordering information for the expansion modules and related connectivity options.

Table 6. Expansion modules and connectivity options

Description	Part number	Feature code (MTM 6411-HC3)	Max qty per one E1012 or E1024
Expansion modules			
Lenovo Storage Expansion SAS IO Module	00WC085	AT27	2
SAS expansion connectivity cables			
External MiniSAS 8088/MiniSAS 8088 1m cable	00WE755	AT1B	2*
External MiniSAS 8088/MiniSAS 8088 0.6m cable	00WE754	AT1A	2*
External MiniSAS 8088/MiniSAS 8088 2m cable	00WE756	AT1C	2*

\* One cable per SAS expansion module

## Drives

The S2200 LFF chassis and the E1012 expansion enclosure support up to 12 LFF hot-swap drives. The S2200 SFF chassis and the E1024 expansion enclosure support up to 24 SFF hot-swap drives.

The following table lists drive options for the S2200 LFF chassis and the E1012 expansion enclosure.

Table 7. LFF drive options

Description	Part number	Feature code (MTM 6411-HC1, 6411-HC3)	Max qty per one S2200 LFF or E1012
<b>3.5-inch SAS hot-swap HDDs</b>			
Lenovo Storage 3.5" 900GB 10K SAS HDD (2.5" in 3.5")	00WC035	AT1Z	12
<b>3.5-inch SAS hot-swap SSDs (10 DWD)</b>			
Lenovo Storage 3.5" 400GB SSD SAS (2.5" in 3.5")	00WC030	AT20	12

The following table lists drive options for the S2200 SFF chassis and the E1024 expansion enclosure.

Table 8. SFF drive options

Description	Part number	Feature code (MTM 6411-HC1, 6411-HC3)	Max qty per one S2200 SFF or E1024
<b>2.5-inch NL SAS hot-swap HDDs</b>			
Lenovo Storage 2.5" 1TB 7.2k NL-SAS HDD	00MM705	AT1R	24
<b>2.5-inch SAS hot-swap SSDs (3 DWD)</b>			
Lenovo Storage 2.5" 800GB 3DWD SSD	00YH978	AU21	24
<b>2.5-inch SAS hot-swap SSDs (10 DWD)</b>			
Lenovo Storage 2.5" 400GB SSD (SAS)	00MM720	AT1S	24
Lenovo Storage 2.5" 1.6TB SSD (SAS)	00MM710	AT1U	24

## Software

The S2200 comes standard with the following software features:

- Intelligent Real-time Tiering for HDDs
- Virtualized Storage Pools
- Thin Provisioning
- SSD Read Cache
- Rapid RAID Rebuild
- Snapshots: up to 64 targets

The functionality of the S2200 can be expanded with the following optional software features:

- Intelligent Real-time Tiering for SSDs (Required for hybrid array configurations with SSDs and HDDs)
- Snapshots: up to 256 targets
- Snapshots: up to 512 targets
- Asynchronous replication

The following table lists the Feature on Demand (FoD) upgrades for the S2200 to enable optional software features. Each optional S2200 function is licensed on a per-system basis and covers both controller enclosure and all attached expansion units.

Table 9. Optional FoD upgrades for software features

Description	Part number	Feature code
256 Snapshot Upgrade License	01GV558	AWGL
512 Snapshot Upgrade License	01GV559	AWGM
SSD Data Tiering License*	01GV561	AWGP
Asynchronous Replication License**	01GV562	AWGQ

\* Prior to the firmware version GL221R019-05, the SSD Data Tiering Upgrade option was required for all flash array configurations (a storage system with SSDs only; no HDDs installed) and for hybrid array configurations (a storage system with SSDs and HDDs). With the firmware version GL221R019-05 or later, the SSD Data Tiering Upgrade option is no longer required for all flash array configurations; however, it is required for hybrid configurations.

\*\* Asynchronous Replication requires an FC and iSCSI Controller-based S2200 storage unit.

Software maintenance for standard software features is included in the S2200 base warranty and optional warranty extensions, which provides 3-year software support with the option to extend it up to 5 years in 1-year or 2-year increments (see the Warranty section for details).

Optional software features that are listed in Table 9 include 3-year software maintenance with the ability to extend it up to 5 years in 1-year or 2-year increments with the purchase of the software maintenance extension options that are listed in the following table.

**Note:** The S2200 must have active warranty coverage for the duration of an intended software maintenance extension period.

Table 10. Software maintenance extension options

Description	Part number	Feature code (MTM 6411-HC1)
Lenovo Storage 256 Snapshot Upgrade Maintenance 1 yr	00WF817	ATT2
Lenovo Storage 256 Snapshot Upgrade Maintenance 2 yr	00WF821	ATT3
Lenovo Storage 512 Snapshot Upgrade Maintenance 1 yr	00WF825	ATT4
Lenovo Storage 512 Snapshot Upgrade Maintenance 2 yr	00WF829	ATT5
Lenovo Storage SSD Data Tiering Maintenance 1 yr	00WF841	ATT8
Lenovo Storage SSD Data Tiering Maintenance 2 yr	00WF845	ATT9
Lenovo Storage Asynch Replication Maintenance 1yr	00YG680	ATTA
Lenovo Storage Asynch Replication Maintenance 2yr	00YG684	ATTB

## Power cables

The S2200, E1012, and E1024 ship standard with two 4.3 m, 10 A/100 - 250 V, C13 to IEC 320-C14 Rack Power Cables. Other power cable options are also available. The part numbers and feature codes to order them (two power cables are required per each S2200, E1012, and E1024) are listed in the following table.

Table 11. Part numbers and feature codes for ordering power cables

Description	Part number	Feature code (MTM 6411-HC1, 6411-HC3)
<b>Rack power cables</b>		
1.2m, 10A/100-250V, 2 Short C13s to Short C14 Rack Power Cable	47C2487	A3SS
1.2m, 16A/100-250V, 2 Short C13s to Short C20 Rack Power Cable	47C2491	A3SW
1.5m, 10A/100-250V, C13 to IEC 320-C14 Rack Power Cable	39Y7937	6201
2.5m, 10A/100-250V, 2 Long C13s to Short C14 Rack Power Cable	47C2488	A3ST
2.5m, 16A/100-250V, 2 Long C13s to Short C20 Rack Power Cable	47C2492	A3SX
2.8m, 10A/100-250V, 2 Short C13s to Long C14 Rack Power Cable	47C2489	A3SU
2.8m, 10A/100-250V, C13 to IEC 320-C14 Rack Power Cable	None*	6311
2.8m, 10A/100-250V, C13 to IEC 320-C20 Rack Power Cable	39Y7938	6204
2.8m, 16A/100-250V, 2 Short C13s to Long C20 Rack Power Cable	47C2493	A3SY
4.1m, 10A/100-250V, 2 Long C13s to Long C14 Rack Power Cable	47C2490	A3SV
4.1m, 16A/100-250V, 2 Long C13s to Long C20 Rack Power Cable	47C2494	A3SZ
4.3m, 10A/100-250V, C13 to IEC 320-C14 Rack Power Cable	39Y7932	6263
<b>Line cords</b>

United Kingdom 10A/250V C13 to BS 1363/A 2.8m line cord	39Y7923	6215

## Physical specifications

The S2200, E1012, and E1024 have the following dimensions and weight (approximate):

- LFF chassis:
  - Height: 87 mm (3.4 in.)
  - Width: 447 mm (17.6 in.)
  - Depth: 523 mm (20.6 in.)
- SFF chassis:
  - Height: 89 mm (3.5 in.)
  - Width: 447 mm (17.6 in.)
  - Depth: 519 mm (20.5 in.)
- Weight:
  - S2200 LFF: Minimum: 17.7 kg (39.0 lb); Maximum: 27.5 kg (60.6 lb)
  - S2200 SFF: Minimum: 17.8 kg (39.2 lb); Maximum: 24.3 kg (53.6 lb)
  - E1012: Minimum: 16.8 kg (37.0 lb); Maximum: 26.6 kg (58.6 lb)
  - E1024: Minimum: 16.9 kg (37.2 lb); Maximum: 23.4 kg (51.6 lb)

## Operating environment

The S2200, E1012, and E1024 are supported in the following environment:

- Air temperature:
  - Operating: 5 °C - 40 °C (41 °F - 104 °F); decrease the maximum ambient temperature by 3.3 °C for every 1,000 m (3,280 ft)
  - Storage: -10 °C - +60 °C (14 °F - 140 °F)
  - Maximum altitude: 3,000 m (9,842 ft)
- Humidity:
  - Operating: 8% - 85% (non-condensing)
  - Storage: 5% - 90% (non-condensing)
- Electrical: 100 to 240 (nominal) V AC; 50 Hz - 60 Hz
- BTU output: 1488 Btu/hr (436 W)
- Noise level: 6.8 bels

## Warranty

The S2200 includes a three-year parts-only warranty with 9x5/next business day (NBD) terms. Lenovo offers the service upgrades through warranty maintenance upgrades and post-warranty maintenance agreements with a well-defined scope of services, including service hours, response time, term of service, and service agreement terms and conditions.

Lenovo warranty service upgrade offerings are region-specific. Not all warranty service upgrades are available in every region. For more information about Lenovo warranty service upgrade offerings that are available in your region, refer to the Data Center Advisor and Configurator (DCACT; formerly known as LESC):

<http://lesc.lenovo.com>.

Warranty service definitions for the S2200 system are listed in the following table.

Table 12. Warranty service definitions

Term	Description
On-site service	A service technician will arrive at the client's location for equipment service.
24x7x4 hour	A service technician is scheduled to arrive at the client's location within four hours after remote problem determination is completed. Lenovo provides service around the clock, every day, including Lenovo holidays.
9x5x4 hour	A service technician is scheduled to arrive at the client's location within four business hours after remote problem determination is completed. Lenovo provides service 8:00 am - 5:00 pm in the client's local time zone, Monday-Friday, excluding Lenovo holidays. For example, if a customer reports an incident at 3:00 pm on Friday, the technician arrives by 10:00 am the following Monday.
9x5 next business day	A service technician is scheduled to arrive at the client's location on the business day after remote problem determination is completed. Lenovo provides service 8:00 am - 5:00 pm in the client's local time zone, Monday - Friday, excluding Lenovo holidays. Calls received after 4:00 pm local time require an extra business day for service dispatch. Next business day service is not guaranteed.

In general, the following types of Lenovo warranty service upgrades for the S2200 are available:

- Warranty and maintenance service upgrades:
  - Onsite support for 9x5 NBD coverage
  - 4-hour target response time with onsite, 9x5 or 24x7 service coverage
  - Up to five years of warranty extension for all service levels in one or two year increments
- Hard Drive Retention
 

Lenovo's Hard Drive Retention service is a multi-drive hard drive retention offering that ensures your data is always under your control, regardless of the number of hard drives that are installed in your Lenovo system. In the unlikely event of a hard drive failure, you retain possession of your hard drive while Lenovo replaces the failed drive part. Your data stays safely on your premises, in your hands. The Hard Drive Retention service can be purchased in convenient bundles with our warranty upgrades and extensions.

## Regulatory compliance

The S2200 conforms to the following regulations:

- UL 60950-1, 2nd Edition, 2007-03-27 (USA)
- CAN/CSA-C22.2 No 60950-1-07, 2nd Edition, 2007-03 (Canada)
- IEC 60950-1:2005 (2nd Edition); Am 1:2009
- EN 60950-1:2005, 2nd Edition, AM1 2009 (EU)
- CFR 47 Part 15 Subpart B Class A (USA FCC)
- ICES-003:2012, Class A (Canada)
- EN 55022: 2010 Class A (EU)
- EN 55024: 2010 (EU)
- ASNZS CISPR 22 -2009 Class A
- CNS 14338 (2006)
- KN22 Class A
- VCCI Technical Requirements 2012 Class A
- RoHS Directive 2011/65/EU
- EAC
- NOM
- BMSI
- CCC

## Interoperability

Lenovo provides end-to-end storage compatibility testing to deliver interoperability throughout the network. The S2200 supports attachment to Lenovo ThinkSystem, System x®, ThinkServer®, and Flex System™ hosts by using SAS, iSCSI, or Fibre Channel storage connectivity protocols.

**Note:** Tables that are provided in this section are for ordering reference purposes only. End-to-end storage configuration support *must* be verified through the Lenovo Storage S2200/S3200 Interoperability Matrix that can be found on the S2200 Documentation page:

<http://datacentersupport.lenovo.com/us/en/products/storage/lenovo-storage/s2200/6411/documentation>

### SAS interoperability

The SAS adapters that are listed in the following table are compatible with the S2200 SAS storage (direct attach).

Table 13. S2200 SAS adapter interoperability

Description	Part number
ThinkSystem servers	
ThinkSystem 430-8e SAS/SATA 12Gb HBA	7Y37A01090
ThinkSystem 430-16e SAS/SATA 12Gb HBA	7Y37A01091
System x servers	
N2125 SAS/SATA HBA	46C9010
N2225 SAS/SATA HBA	00AE912
N2226 SAS/SATA HBA	00AE916
ThinkServer servers	
Lenovo ThinkServer 9300-8e PCIe 12Gb 8 Port External SAS Adapter by LSI	4XB0F28703

### iSCSI interoperability

The S2200 supports iSCSI attachments via standard 1 Gb or 10 Gb Ethernet network. Any compatible Ethernet switch, including Lenovo RackSwitch™ top of rack (TOR) switches and integrated Flex System Ethernet I/O modules, can be used to provide iSCSI connectivity with the S2200 iSCSI storage.

With software iSCSI initiators, any supported 1 Gb Ethernet or 10 Gb Ethernet adapter for Lenovo servers is compatible with the S2200 iSCSI storage. For more information about hardware iSCSI initiators (iSCSI HBAs), see the S2200/S3200 Interoperability Matrix.

## Fibre Channel interoperability

The S2200 supports FC direct attachments and FC switch based attachments. Brocade and QLogic SAN switches can be used to provide FC connectivity with the S2200 FC storage.

The FC adapters that are listed in the following table are compatible with the S2200 FC storage.

Table 14. S2200 FC adapter interoperability

Description	Part number
<b>ThinkSystem servers - 32 Gb FC</b>	
ThinkSystem Emulex LPe32000-M2-L PCIe 32Gb 1-Port SFP+ Fibre Channel Adapter	7ZT7A00517
ThinkSystem Emulex LPe32002-M2-L PCIe 32Gb 2-Port SFP+ Fibre Channel Adapter	7ZT7A00519
ThinkSystem QLogic QLE2740 PCIe 32Gb 1-Port SFP+ Fibre Channel Adapter	7ZT7A00516
ThinkSystem QLogic QLE2742 PCIe 32Gb 2-Port SFP+ Fibre Channel Adapter	7ZT7A00518
<b>System x - 16 Gb FC</b>	
Brocade 16Gb FC Dual-port HBA	81Y1675
Brocade 16Gb FC Single-port HBA	81Y1668
Emulex 16Gb FC Dual-port HBA	81Y1662
Emulex 16Gb FC Single-port HBA	81Y1655
QLogic 16Gb FC Single-port HBA	00Y3337
QLogic 16Gb FC Dual-port HBA	00Y3341
<b>System x - 8 Gb FC</b>	
Emulex 8Gb FC Dual-port HBA	42D0494
Emulex 8Gb FC Single-port HBA	42D0485
QLogic 8Gb FC Dual-port HBA	42D0510
QLogic 8Gb FC Single-port HBA	42D0501
<b>ThinkServer - 16 Gb FC</b>

Lenovo B6510, 24 ports activated, 24x 8Gb SWL SFPs, 2 PS, Rail Kit	3873BR2
<b>16 Gb FC</b>	
Lenovo ThinkSystem DB610S, 8 ports activated, 8x 16Gb SWL SFPs, 1 PS, Rail Kit	6559D2Y
Lenovo ThinkSystem DB610S, 24 ports activated, 24x 16Gb SWL SFP, Enterprise SW, 1 PS, Rail Kit	6559D1Y
Lenovo B6505, 12 ports activated w/ 16Gb SWL SFPs, 1 PS, Rail Kit	3873AR5
Lenovo B6510, 24 ports activated w/ 16Gb SWL SFPs, 2 PS, Rail Kit	3873BR3
<b>32 Gb FC</b>	
Lenovo ThinkSystem DB610S, 8 ports activated, 1 PS, Rail Kit	6559D3Y
Lenovo ThinkSystem DB620S, 24 Ports Activated, 24x 32Gb SWL SFPs, 2 PS, Rail Kit	6415G11
Lenovo ThinkSystem DB620S, 48 Ports Activated, 48x 32Gb SWL SFPs, 2 PS, Rail Kit	6415G2A
Lenovo ThinkSystem DB400D 32Gb FC Director, Up to 192 ports, 8U, Enterprise SW	6684B2A
Lenovo ThinkSystem DB800D 32Gb FC Director, Up to 384 ports, 14U, Enterprise SW	6682B1A

The following table lists the Ethernet and Fibre Channel integrated switches for Flex System that can be used in S2200 storage solutions.

Table 16. Ethernet and Fibre Channel integrated switches for Flex System

Description	Part number
<b>10 Gb Ethernet (iSCSI connectivity)</b>	
Lenovo Flex System SI4091 10Gb System Interconnect Module	00FE327
Lenovo Flex System Fabric SI4093 System Interconnect Module	00FM518
Lenovo Flex System Fabric EN4093R 10Gb Scalable Switch	00FM514
Lenovo Flex System Fabric CN4093 10Gb Converged Scalable Switch	00FM510
Flex System EN4023 10Gb Scalable Switch	94Y5212
Cisco Nexus B22 Fabric Extender for Flex System*	94Y5350
Cisco Nexus B22 Fabric Extender with FET bundle for Flex System*	94Y5355
<b>16 Gb Fibre Channel</b>	
Flex System FC5022 16 Gb SAN Scalable Switch	88Y6374
Flex System FC5022 24-port 16 Gb SAN Scalable Switch (includes two 16 Gb SFPs)	00Y3324
Flex System FC5022 24-port 16 Gb ESB SAN Scalable Switch	90Y9356

\* Requires a supported Cisco Nexus top of rack switch

## Operating systems

The S2200 supports host attachments with the following host operating systems:

- Microsoft Windows Server 2016
- Microsoft Windows Server 2012 R2
- Red Hat Enterprise Linux 7 Update 3
- Red Hat Enterprise Linux 7 Update 2
- Red Hat Enterprise Linux 7
- Red Hat Enterprise Linux 6 Update 8
- Red Hat Enterprise Linux 6 Update 7
- SUSE Linux Enterprise Server 12 SP2
- SUSE Linux Enterprise Server 12 SP1
- SUSE Linux Enterprise Server 12
- SUSE Linux Enterprise Server 11 SP4
- VMware vSphere 6.5
- VMware vSphere 6.0 Update 3
- VMware vSphere 6.0 Update 2
- VMware vSphere 6.0 Update 1
- VMware vSphere 6.0
- VMware vSphere 5.5 Update 3
- VMware vSphere 5.5 Update 2
- VMware vSphere 5.5

Other configurations might be supported; for more information, see the S2200/S3200 Interoperability Matrix.

## Rack cabinets

The following table lists the rack cabinets that are offered by Lenovo that can be used in S2200 storage solutions.

Table 17. Rack cabinets

Description	Part number
25U S2 Standard Rack	93072RX
25U Static S2 Standard Rack	93072PX
42U S2 Standard Rack	93074RX
42U 1100mm Enterprise V2 Dynamic Rack	93634PX
42U 1100mm Enterprise V2 Dynamic Expansion Rack	93634EX
42U 1200mm Deep Dynamic Rack	93604PX
42U 1200mm Deep Static Rack	93614PX
42U Enterprise Rack	93084PX
42U Enterprise Expansion Rack	93084EX

For more information, see the list of Product Guides in the Rack cabinets category:  
<http://lenovopress.com/servers/options/racks>

## Power distribution units

The following table lists the the power distribution units (PDUs) that are offered by Lenovo that can be used in S2200 storage solutions.

Table 18. Power distribution units

Description	Part number
<b>0U Basic PDUs</b>	
0U 36 C13/6 C19 24A/200-240V 1 Phase PDU with NEMA L6-30P line cord	00YJ776

## Lenovo Financial Services

Lenovo Financial Services reinforces Lenovo's commitment to deliver pioneering products and services that are recognized for their quality, excellence, and trustworthiness. Lenovo Financial Services offers financing solutions and services that complement your technology solution anywhere in the world.

We are dedicated to delivering a positive finance experience for customers like you who want to maximize your purchase power by obtaining the technology you need today, protect against technology obsolescence, and preserve your capital for other uses.

We work with businesses, non-profit organizations, governments, and educational institutions to finance their entire technology solution. We focus on making it easy to do business with us. Our highly experienced team of finance professionals operates in a work culture that emphasizes the importance of providing outstanding customer service. Our systems, processes, and flexible policies support our goal of providing customers with a positive experience.

We finance your entire solution. Unlike others, we allow you to bundle everything you need from hardware and software to service contracts, installation costs, training fees, and sales tax. If you decide weeks or months later to add to your solution, we can consolidate everything into a single invoice.

Our Premier Client services provide large accounts with special handling services to ensure these complex transactions are serviced properly. As a premier client, you have a dedicated finance specialist who manages your account through its life, from first invoice through asset return or purchase. This specialist develops an in-depth understanding of your invoice and payment requirements. For you, this dedication provides a high-quality, easy, and positive financing experience.

For your region specific offers, ask your Lenovo sales representative or your technology provider about the use of Lenovo Financial Services. For more information, see the following Lenovo website:
